**Wins Award,
Delivers Keynote
Address at Conference**

Posted April 5, 2013

Professor Eileen M. Maloney, chairperson of the PCCC Radiography Department was selected to deliver the keynote address and to receive a prestigious award at the annual conference in Atlantic City last month of the New Jersey Society of Radiologic Technologists (NJRT) and the New Jersey Educators in Radiologic Imaging (NJERI).

For the second time in her career, Professor Maloney received the Adeline J. Eicholz Memorial Lecturer Award, presented annually to an educator who has made a significant contribution to the profession or to the conference. She previously received the award in 2004.

In her keynote address, “People Imaging vs. Patient Imaging,” Professor Maloney drove the point that despite changing technology, “the one thing that stays constant is the patients and their needs.”

“The purpose of the lecture was to refocus the technologists,” said Professor Maloney in a recent interview, “and remind them that one of the main reasons they entered healthcare was to help people.”

This is also the second time Professor Maloney has been chosen as keynote speaker for the conference.

A life member and past president of the NJSRT, Professor Maloney was also a representative of the American Registry of Radiologic Technologists(ARRT) which is the national certification organization for the radiologic sciences. Professor Maloney is a trustee of that organization and a member of the Radiologic Technology Board of Examiners of New Jersey, the state licensing board for radiologic technology.
